REFERENCE RULE 3078B

NOTE: Please use this or similar sign to post at your show.

CONTACTS FOR PROBLEMS AT THE SHOW

As you managed more and more shows problems will arise that are beyond your control, i.e. judge gets stranded and cannot make to your show and you are 8 hours out from your start time, your judge has started working and gets ill and must leave and probably the worst scenario is your judge refuses to start the show because of someone on the grounds that he says he has a conflict of interest with and demands that you or he speak to the PHBA General Manager. If you encounter any of the above you should begin by contacting:

1. PHBA General Manager - Terri Green
PHBA Office - 918-438-1234
2. Show Management Committee Chairman –
Debbie Wall
Phone – 256-441-1081

A. Additionally, if show management allows an individual(s) to exhibit without proper PHBA membership, show management will be held responsible and billed in the amount of that membership.

B. Furthermore, failure of show management to follow and enforce any rules could result in the loss of future show approval(s).

C. Points will be withheld until the membership is paid. Membership must be received with the same calendar year as the horse show in order for the point to be awarded.

3078. All show secretaries shall adhere to all PHBA rules and regulations and shall submit any and all show documents to the APA for reference.

A. Require a signed entry form, which includes all days of a horse show or circuit, at each PHBA approved show;

B. All Show Secretaries shall inspect a current year PHBA membership or PHBA amateur membership or PHBA novice amateur or PHBA youth membership or PHBA novice youth membership card or photocopy of same for the owner(s) and exhibitor(s) of each horse. Class 1:

Stimulant and depressant drugs that have the highest potential to affect performance and that have no generally accepted medical use in the racing horse. Many of these agents are Drug Enforcement Agency (DEA) schedule II substances. These include the following drugs and their metabolites:

Opiates, opium derivatives, synthetic opioids and psychoactive drugs, amphetamines and amphetamine-like drugs as well as related drugs, including but not limited to apomorphine, nikethamide, mazindol, pemoline, and pentylentetrazol.

Class 2:

Drugs that have a high potential to affect performance, but less of a potential than drugs in Class 1. These drugs are 1) not generally accepted as therapeutic agents in racing horses, or 2) they are therapeutic agents that have a high potential for abuse.

Drugs in this class include: psychotropic drugs, certain nervous system and cardiovascular system stimulants, depressants, and neuromuscular blocking agents.

Injectable local anesthetics are included in this class because of their high potential for abuse as nerve blocking agents.

Class 3:

Drugs that may or may not have generally accepted medical use in the racing horse, but the pharmacology of which suggests less potential to affect performance than drugs in Class 2. Drugs in this class include bronchodilators and other drugs with primary effects on the autonomic nervous system, procaine, antihistamines with sedative properties and the high-ceiling diuretics.

Class 4:

This class includes therapeutic medications that would be expected to have less potential to affect performance than those in Class 3. Drugs in this class includes less potent diuretics; anabolic steroids; corticosteroids; antihistamines and skeletal muscle relaxants without prominent central nervous system (CNS) effects; expectorants and mucolytics; hemostatics; cardiac glycosides and anti-arrhythmics; topical anesthetics; antidiarrheals and mild analgesics. This class also includes the non-steroidal anti-inflammatory drugs (NSAIDs), at concentrations greater than established limits.

Class 5:

This class includes those therapeutic medications for which concentration limits have been established by the racing jurisdictions as well as certain miscellaneous agents such as dimethylsulfoxide (DMSO) and other medications as determined by the regulatory bodies. Included specifically are agents that have very localized actions only, such as anti-ulcer drugs, and certain anti-allergic drugs. The anticoagulant drugs are also included.
