see attached

Originator's justification for change and impact if not passed: (Proposal will be return if not completed)

see attached

Estimated revenue to association with rule change N/A

Estimated expense to association with rule change N/A

RECEIVED NOV 15 2019

Recommendation for change-

Unregistered palomino color horse

546. The ancestry or bloodline of these horses will not be shown on the registration certificate, unless it can be verified in fact. Methods of verifying facts should include, but not be limited to, recognized breed breeder certificates, stallion breeding reports, and methods through genetic testing via PHBA recognized laboratories.

A. Any resulting offspring, other than palomino in color, are not eligible for registry in the Palomino Bred program, unless parentage can be verified in fact by methods listed above.

Justification for change-

We rely on the primary breed papers to support parentage to be fact. With no verification of parentage on the unregistered palomino horse, it cannot be proven by fact that said offspring is who they say it is, a PB. If a resulting foal is palomino, it can register on its own merits as palomino in color.
